REMARKS

Claims 3, 5, 7, 9, and 11 remain pending in the application. It is proposed to amend claims 3 and 7 without introduction of new matter. Favorable consideration and entry of these amendments are respectfully requested in view of the following remarks.

The courtesy extended to Applicants' representative in a telephonic interview conducted on August 25, 2005 is noted with appreciation. In that interview, the parties agreed to certain amendments to the claims, which were subsequently made by Examiner's Amendment as shown in the Notice of Allowability.

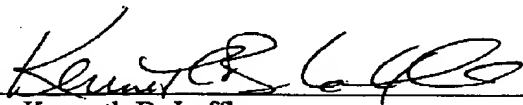

In reviewing the Examiner's Amendment, several typographical errors were noted, which Applicants now propose to correct. In particular, in claim 3 it is proposed to change the phrase "the power ... are detected" to read "the *powers* ... are detected", which matches the language originally recited in claim 6. Similarly, in claim 7 it is proposed to change the phrase "detecting the power ... and adding them together" to read "detecting the *powers* ... and adding them together", which matches the language originally recited in claim 10.

Also, in claim 3 it is proposed to change "a means for detecting ..." to read "means for detecting ..." as is conventionally used in U.S. patent practice and as is recited in the original language recited in claim 6.

None of these amendments raise new issues or require a new search. Accordingly, it is respectfully requested that they be entered, and that the application proceed to issuance.

Respectfully submitted,
Potomac Patent Group PLLC
